Very effective. Does whatever is needed to ensure every student understands the material			
Very Effectiveness, willing to help anyone relating to dynamics and very fair teacher.			
I learned a lot and was provided with all the material I could have possibly needed to succeed in the course.			
He taught well, but spent a lot of time on things that were rather pointless. Overall, i would give him a 8/10 on overall effectiveness.			
• I loved his class structure. He has things set up so that you can learn from lecture, learn from the book, or learn from countless example problems on his own website.			
 Scott is an awesome professor who really cares about his students and their learning. He doesn't care how many A's he gives out, he just wants his students to understand the material. He is entertaining and has a lot of energy. I really enjoyed his class when we were able to meet in person. Very effective 			
Very fair and honest professor.			
He was effective for the most part.			
 Very effective. The material was taught in a relatively easy way for me to understand considering the difficulty of the material. When questions were asked, he made sure you understood the answer.

Definitely a good dude			
really enjoyed the class			
Very kind professor and very fair to students			
• I want to reiterate that the only complaint i have had in his whole class, is his attempts to make the class fun by showing examples that were not always relevant to me(but definitely could have been to others, but i will never know). I HOPE I will have the chance to take Mr. Thomas again.			
• You are a wonderful professor, and I hope that I get to have you again for more classes. Please keep up the good work, and as they say in Monty Python, "You never expect a Spanish Inquisition."			
• Great professor, will definitely try to take him again. He's all about his students trusting him and after taking this class, I definitely trust him, he is very fair.			

• Overall, Scott was a wonderful instructor.

• I wish he would've done more examples in class before the semester became online learning.
