

# CS 405/605 Paper Review Project

## Possible Topics

- Database models
- Database access mechanism (such as indexing, hashing, etc)
- Query optimization
- Concurrency control and recovery
- Parallel algorithms for query processing
- Performance evaluation of DBMS
- Parallel database systems
- Distributed database
- Multidatabases (federated databases)
- Expert database
- Logic and database
- Multimedia database
- Object-Oriented database
- Image database
- Engineering database
- CAD/CAM database
- Text retrieval system
- Data mining
- Data warehousing
- Other relevant topics
